

DISPENSER ASSEMBLY
INCLUDING A ROTATING DISPENSING CAROUSEL

ABSTRACT OF THE DISCLOSURE

5 A dispenser apparatus including a rotating
carousel to feed material from an inlet to a
discharge outlet. In the illustrated embodiments,
the carousel includes a cone shaped portion to
facilitate material flow to dispense a metered
10 quantity of material. The apparatus described has
particular application for dispensing a glutinous
particulate or material. In an illustrated
embodiment, a scale is used to control metered
quantities which as described includes cantilevered
15 beams supporting a floating tray for measuring a
dispensed quantity.
